R i

Run Save

```
1 with(mtcars, plot(mpg, qsec))
```

Program input

Output

A scatter plot showing the relationship between miles per gallon (mpg) on the x-axis and time to accelerate from 0 to 60 mph (qsec) on the y-axis. The x-axis ranges from approximately 10 to 35, and the y-axis ranges from 15 to 22. The data points show a negative correlation, with higher mpg generally corresponding to lower qsec.

mpg	qsec
